

For Immediate Release

Mitchell Murphy Joins Hillary Machinery's Service Team in Tulsa

January 3, 2012 – Tulsa, OK – Mitchell Murphy has joined Hillary Machinery LLC in Tulsa as Field Service Technician. Murphy brings 7 years of CNC education, machining and programming experience to the organization. A graduate of Coweta High School in Coweta, Ok, Murphy later attended the Indian Capital Technology Center in Muskogee, Ok; the Tulsa Technology Center in Tulsa; Hexagon Metrology and MLC-CAD (both in Dallas, Tx.) where he received training in Machine Tool Technology, Esprit, PS-DMIS CAD, and MasterCam programming. Murphy has also worked as a machinist, programmer, and Assistant CNC Supervisor for manufactures and job shops in and around Tulsa, Ok.

“More than ever shops are looking to their vendors to provide value added support and training when they purchase a piece of equipment,” explains Jeff Messenger, President, Hillary Machinery LLC (OK). “Mitchell gives us the ability to install, train, and service our customers locally. His extensive knowledge with Esprit allows us to provide tool layouts and time studies for customers with existing or new jobs. One of the concerns when purchasing a new machine for a new or an existing job is the difficulty in checking all the clearances and part run times, especially with multitasking machines, before actually running the part on the machine. Mitchell’s experience with Esprit allows us to program the part off-line, check tool interferences, and gives us an estimated cycle time based on a specific machine model. It takes a lot of the guess work out of the purchasing process for our customers.”
