

For Immediate Release

Volk Uniontech Takes Delivery of 2nd Hyundai-Kia VX500

Houston, Texas – August 1, 2010- Hillary Machinery Inc and Hyundai-Kia Machine America deliver the 2nd of 2 machines to Houston based VOLK Uniontech (www.volkvalves.com). Volk Uniontech is a leading manufacturer of valves for severe applications primarily within the power generation, chemical and refining industries. The success of the first Hyundai-Kia VX500 at Volk's China facility is what led to the purchase of the 2nd for their Houston facility.

About Volk Uniontech

VOLK is a leading manufacturer of valves for severe applications. Our main customers are power generation, chemical and refining industries. We are proud of our metal seated ball valves designed for a long life and zero leakage. The valves are designed for high temperature, high pressure, and floating particles fluid applications. VOLK's focus is on technical innovation and new applications. One of our advanced designs is the combination of integral body and seat. In addition the company provides a special ball valve combined with pressure reduction and control for a long life and severe applications. The secret to our strength is a combination of quality, technology and a second to none sales service. VOLK also supplies gate, globe, and check valves. Our product line includes cryogenic service valves to match the applications requested. With a successful sales history in the power generation in China, VOLK is rapidly evolving to a leader recognized in the international arena as a leading manufacturer with the highest quality standards. VOLK is your valuable partner in solving leakage problems.

About Hyundai-Kia

Hyundai-Kia machine America is a Division of HYUNDAI WIA Corp., and part of the Hyundai Motor group. Hyundai-Kia Machine America Corp serves North and South America through a network of distributors with world-class CNC machine tools for the Automotive, Aircraft, Electronics, Farm Equipment, Hydraulics, Medical and all related metal cutting industries. Hyundai-Kia supplies gang turning machines, turning machines with milling and sub-spindle, Inverted Turning machines for Automation, Vertical Machining Centers, Horizontal Machining Centers and Boring Mills of various sizes and capacities. Hyundai-Kia machines are known for their exceptional reliability and quality, as well as for their highly competitive pricing. The Hyundai-Kia Machine Corporation's headquarters is located in the Gaeumjeong Factory in Changwon, Kyongnam, South Korea. Products such as machining equipment, robots, industrial machinery, specialized machines, aircraft parts, and iron and steel products are manufactured at this 1.5 million square-ft. facility, where 1,100 employees are employed.
